Subject: Deficiencies

Gary--

The maps you submitted look good, but there were some other issues in our deficiency letter of October 11. Here they are:

2. The discussion of the mining operations needs to include more detail. The Division understands you will be operating in the old Factory Butte Mine pit, but will you be excavating in the pit floor or into the highwall? How deep will the excavation be? How much overburden do you anticipate will need to be moved to expose the ore? This discussion should be submitted as an attachment to the NOI.

3. Information from the Division of Corporations indicates Dick Shumway is the secretary of Organa Minerals, and this conflicts with the information in the NOI. Luke Jackson is not listed as an officer with the Division of Corporations. Please update the information in the NOI or provide documentation that the information in the NOI is correct.

Please submit this in the form of replacement pages for the NOI. I am attaching a copy of the NOI. Let me know if you have questions.

Subject: One more item . . .

There's one more thing you need to do to satisfy the deficiency letter. It says, "The discussion of the mining operations needs to include more detail. The Division understands you will be operating in the old Factory Butte Mine pit, but will you be excavating in the pit floor or into the highwall? How deep with the excavation be? How much overburden do you anticipate will need to be moved to expose the ore? This discussion should be submitted as an attachment to the NOI."

Could you please provide this information? Thank you.
